Education

NIT, Trichy

B.Tech - Production, Minor in Computer Science and Engineering, GPA: 8.88

Jan 2024 — Present

Shri Krishna Public School, Indore

Class XII, GPA: 83.2%

Jan 2023 — Dec 2023

Vidyasagar School Indore

Class X, GPA: 95.2%

Jan 2021 — Dec 2021

Projects

Book Buddy: Personal Library Management Platform | React, Node.js, Express, MongoDB, JWT

Oct 2025

- Architected full-stack reading tracker with role-based access control, implementing JWT authentication and MongoDB compound indexing (user+book, user+status) for optimized reading list queries
- Built collaborative filtering recommendation engine with Gutendex API integration for public domain discovery and server-side PDF export functionality for personalized analytics reports
- Designed RESTful API with 8+ MVC controllers featuring real-time progress tracking, Multer file uploads, and MongoDB aggregation pipelines for analytics dashboards (velocity charts, genre distribution)

Smart Campus E-Gate Entry – Exit Authentication System | React, EJS, Node, Express

Dec 2025

- Designed and implemented a secure campus access management system for NIT Trichy to digitize entry–exit verification for students, visitors, and cab drivers, replacing manual gatekeeping processes.
- Enforced institute-domain email authentication, OTP-based authorization, and time-bound QR code generation to prevent unauthorized access, with a guard-facing interface for real-time QR scanning and automated audit logs.
- Built the backend using Node.js, Express, and MongoDB, implementing JWT-based authentication and role-based access control (RBAC) to ensure secure, traceable, and accountable campus operations.

Reel-to-Real : AI-Powered Reel/Shorts to Place Discovery Platform | React, Express, MongoDB, Redis, OpenAI

Feb 2026

- Built AI video processing pipeline using OpenAI Whisper, GPT-4, and Tesseract OCR to extract venue data from Instagram Reels with 70-80% accuracy.
- Implemented async job queue system with BullMQ, Redis, and MongoDB (geospatial 2dsphere indexing) achieving less than 200ms API response time.
- Developed React frontend with Mapbox GL, Zustand state management, and JWT authentication for real-time place discovery and itinerary creation.

Skills

Programming Languages: C++, JavaScript, Python, TypeScript

Frameworks & Libraries: React, Redux, Node.js, Express.js, FastAPI, TailwindCSS, Next.js

Databases: SQL, MongoDB

AI/GenAI Tools: LangChain, OpenAI API, Hugging Face, Ollama, MCP

Vector Databases: Qdrant

Developer Tools: Git, GitHub, Docker, Postman, VS Code, AWS (Basic)
